

an EnPro Industries company

PRESS RELEASE

2nd February 2009

Garlock strengthens UK industry position with PTM acquisition.

Garlock (Great Britain) Limited, leaders in sealing technology, have acquired PTM (UK) Limited, a manufacturer and distributor of sealing solutions. The acquisition supports Garlock's growth in an important market and complements its acquisition of Northern Gaskets and Mouldings in December last year.

PTM is a rubber moulding and gasket fabrication company dealing specifically in custom sealing solutions, gaskets and insulation materials. It distributes high quality seal products and gasketing materials, including Garlock GYLON® and Pharmaseal™. Employing 40 people over two sites in Stockport and Wrexham, PTM has established a

reputation for high quality 'on demand' service and specialist expertise in the chemical, pharmaceutical and OEM markets.

The acquisition brings the benefits of Garlock's strong innovation, research and development and lean manufacturing skills directly to the end user of its sealing technology solutions. It also enhances the products and services Garlock provides to its customers, through an increased focus on operational excellence.

Stuart Phythian, Managing Director of Garlock (Great Britain) Limited, commented, "PTM is a well established distributor and manufacturer of sealing products and brings considerable engineering expertise to Garlock's UK operation. We further expect our combined customers to benefit from Garlock's global expertise in sealing technology applications alongside PTM's knowledge and awareness of its customers' needs. This is another step in Garlock's vision to become the global leader in industrial sealing solutions.

Garlock (Great Britain) Limited is the UK affiliate of Garlock Sealing

Technologies, an EnPro Industries company (NYSE: NPO). Garlock is the acknowledged global leader in high-performance fluid sealing products. These include compression packing, gasketing, hydraulic components, dynamic seals, metal gaskets, high-performance metal seals and critical-service flange gaskets, as well as expansion joints. The company has 18 global operations employing more than 1,700 people and a distributor network that covers 75 countries. Its 12 manufacturing facilities in the U.S., Europe, Asia and Latin America collectively produce the broadest range of fluid sealing products designed specifically for industrial applications. In addition, it operates the most extensive testing facilities in the industry. For more information about the company and its products and services, visit www.garlock.com.
